#### DAILY RECORD

SUNDAY, NOVEMBER 9, 1878.

LOCAL ITEMS. LOCAL MINING REVIEW.

For the week Ending Nov. 8, 1879, Bullion shipments of the week \$64,-

During the past week the excitement with regard to our mines has continued. The stocks have been raising and falling, as it were, by jerks; and faces alternately hopeful and sad might be seen on our streets every day. With regard to the strikes reported, it seems that the ledge found in the American Flag mine is rich and extensive. It is reported as such by those who ought to know most about it. The Washington & Creole stock has risen, but the management of the mine say nothing with regard to new developments. As to the rumored discovery of the best body of ore yet found in the Raymond and & Ely, the talk, as far as the public is concerned, has ceased. A number of those working in the mines in the vicinity of the Washington & Creole and American Flag are expecting to make similar developments to those re-

A still greater excitement than has existed is predicted in the stock market by some of those who are considered, or consider themselves, prophets in such matters. Our only wish is that our prosperity may continue to increase as it has done for the last two weeks.

MEADOW VALLEY. In No. 3 incline, a progress of 11 feet only was made during the past week, owing to a leaking boiler which delayed the work for 48 hours. The west drift from the 10th station has been run 8 feet; the west from the 9th, 323 feet; the east, from the 8th, 385 feet; the east, from the 5th, 585 feet; the east, from incline the work having been de mit incline the work having been de-layed by an accident to the machinery, a progress of two feet only was made. This meline is 846 feet deep. In No. 7 the west drift, from the 8th station is in When a farther distance of 100 feet shall have been accomplished, the connection with No. 5 will be made. The and about 200 men are employed-most v on contracts.

AMERICAN PLAG. The nine was open to those who wished to visit it on last Monday and Tuesday, and quite a number of well snown mining men went down the shaft. At a depth of \$25 feet from the surface there is a vein of ore varying in width from two to five feet. As yet the extent of the ore-body cannot be determined, as it has not yet been fully opened out. At present the work in the mine has been stopped, on account of a considerable amount of replacing and repairing which it is necessary to do. A new reel is to be put in, and the boiler needs mending; besides this, a good deal of other work must be done. It is not known exactly how long it will be before all these im-provements and repairs will be com-

I few men are kept at work in the old shaft, over which a whim is soon to be put up. The moving of the building and the machinery from the old to the new shaft is now going on. It is hoped that this will be completed and that all will be in working order by the first of next month.

The perpendicular shaft is now 977 feet in depth. A new winze has been commenced at the 8th level, and it is in very good ore. At the 7th level, on the late Hermes ground, the workmen are also engaged in sinking a winze in first-

There is ore in the bottom of each of the two winzes, in which workmen are now engaged. There are on the dump between thirty and forty tons of ore. Work will be recommenced in the Marreppa in a week or ten days. SILVER PEAK.

The depth of the incline is now 370 feet. The width of the ledge continues the same as it goes down. During the the same as it goes down. During the week there has been a slight improve-ment in the quality of the ore. CHIEF OF THE HILL.

A progress of 14 feet has been made in the cross-cut from the 360-toot level. The drift at the 210-foot level has been run 11 feet during the week.

CONDOR. The work is being pushed forward vig-erously in the drift from the 160-foot level. Small stringers, bearing metal, appear in the face of the drift, indicating near approach to the ledge

CAROLINE. The shaft is now 465 feet deep, and the men in the bottom are working in soft rock, and making good progress. One shift is working in the cross-cut.

CHIEF EAST EXTENSION. At a depth of 280 feet the ledge is 21/2 feet in width. There is ore on both the foot wall and the hanging wall.

ALPS.

A cross-drift has been run between 30 and 40 feet on the vein, which is four feet wide, and of medium grade ore.

Some time ago the RECORD reported a rich discovery in the Cave mine. Since that the body of ore which was discovered has been more thoroughly opened out; and, as it is further developed the owners are more pleased with their mine. The cres are galena and carbonate. Three assays averaged \$110 to the ton. The fact that the Cave is a rich mine seems well established. For information concerning it, thanks to Louis Sultan.

How STRANGE!-Those passing through pressed with the idea of "nothing to eat." But if the incredulous will only call at Mallet's Market, Main street, they will find out what a wondrous country this is. There they will find out what a wondrous country this is. this sagebrush country are naturally imeat." But if the incredulous will only call at Mallet's Market, Main street, they will find out what a wondrous country this is. There they will find the most gorgeous beef, veal and mutton on the continent. Go to the Mallet Market for supplies, and inquire for Martin Lannan.

Remorse is painted on her duck the gent so much, she never arrived at a satisfactory beau.

ANY PLACE.—"Husband, where shall I get the ticking for our new feather bed?" "Any place where you can get the tick."

#### GARROTING.

There are very few crimes that have not been committed, in every degree of the largest and best assortment of goods wickedness, in this place. If there ever brought to Pioche, consisting of fine has been a small town with all the vices cloths, beavers, cassimeres, vestings, of a creat city fully developed, that town of a great city fully developed, that town is Pioche. The last sensation in the way of crime is a case of garroting, an offense whichhas been rarely if ever committed here before.

Yesterday morning about 3 o'clock, Andrew Young, a miner, started from Armory Hall, where he had been attending the Meagher Guard Ball, to the New York Bakery for the purpose of getting a lunch. As he was passing John Roeder's store on Lacour street, an arm was suddenly thrown out around his neck, choking him, whilst another reached over from behind, and took his watch and chain. The robber would proba-bly have also taken Young's money, but for the fact that his victim, slipping from his choking embrace, fell upon the pave-ment, crying out for help. When Young ment, crying out for help. When Young arose he thought he recognized in the robber, who was a short distance away, a well knownfighter, "Tommy the Headmaker." Officers McKee and Knerr were informed of this by Young, who, shortly after, pointed out to them the individual named. "Tommy the Headmaker," alias Thomas Williams, was then ledged in jail on a charge of highway robbery.

way robbery.

Six o'clock yesterday evening was the time set for his examination, but he having engaged no counsel, and none then available being near at hand, the examination of the counsel. nation was postponed till to-morrow (Monday) at 4 p. m.

IN PROBETE.—The matter in the estate BY GILMER & SALISBURY'S BALT LARR LINE of Wm. Davis, deceased, came up for Miss Jennie Sharp H Arnold hearing last evening before Judge Fuller. It appears that Davis died on the 14th day of December, 1872; and at the time of his death was owner of one-half of a tract of 585, acres of land. Now the Public Administrator desires to get out letters of administration. Judge Corson appeared for the Public Administrator and asked for an order of sale. Messrs. Sabin and Foster come in at the eleventh hour and beg for a week's time, because the order of sale at present might injure the interests of their clients, Henry Phil-lips and Robert Glover. Judge Fuller continued the hearing of the case until next Saturday, and appointed J. Hoff-man, Jerry Dayton and R. S. Clapp as appraisers to appraise the property in the interval.

FIRE!-Pioche people instinctively dread fire, but when we remember the many fire-proof establishments, we begin to take hope. Quillen & Donahue not only keep the best assortment of grocer-ies, but make a specialty of bread. If you need (and who down 17) the staff of life, call at Quillen & Donahue's, Meadow

EXPORTATION OF CATTLE TO GREAT BRITAIN.—Considerable shipments of cattle to Great Britain are now being made by the Anchor line to Glasgow, consigned to Messrs, John Bell & Sons. The ship-A cross-drift has been run between 30 and 40 feet on the vein, which is four feet wide, and of medium grade ore.

FEAVINE.

A drift from the old shaft, at the 30-foot level, is being run to connect with the new shaft. There is good ore in the face of the drift.

HUHN AND HUNT.

Which is four ment of cattle from here is a mere experiment commenced a short time ago. The cattle are bought at Communipaw, fat, and cost on an average £23 sterling. They bring on an average in Glasgow £33 sterling. The cattle lose flesh on the passage across, and that detracts somewhat from the profits. In addition to this loss six have died so far. The number exported up to this time is 250.

Some time ago the Record reported a rich discovery in the Cave mine.

Some time ago the Record reported a rich discovery in the Cave mine.

Some time ago the Record reported a rich discovery in the Cave mine.

Some what from the profits. In addition to this loss six have died so far. The number exported up to this time is 250, of which 150 are at this moment on the way. Returns have been received by cable regarding 100. The worst loss has occurred during the panic, which caused the Bells to lose largely on exchange, while the price of cattle in Glasgow has declined a little. Still a small profit has accrued on the 100 head delivered, and hopes are entertained that it will be made larger by success with those on the way. The cattle are shipped on the main deck. Mr. Henry Bell bought fat cattle at Communipan yesterday to ship next Wednesday by the Anchor line steamer Columbia. He does not know (for experience has not shown it) how the cattle will brave the Winter storms; but he proposes to keep on shipping awhile in hopes that prices of cattle in Glasgow and prices for exchange here will improve.—[N. Y. Com., Sept. 30.

STARTLED.—The clerks at a watch and jewelry establishment were startled the other day by an individual's inquiring if he "couldn't have his entrails en-graved" on his watch-case. After a lit-tle inward laughter, it was suggested that that the applicant's initials might be put on in monogram, which he seemed to think was much the same thing.

NEVER .- The belle who originated the
